Descriptif

In today's highly competitive business environment the art of effective interaction with the customers is crucial to the organization's success. This is especially important in the digital era when consumers are frequently and simultaneously connected to multiple communication platforms. This course examines the digital customer relationship management (CRM) as an integrated strategic, technological and human approach that enables the company to build and maintain mutually beneficial long-term relationships with its customers. It reveals how CRM practices can be used to enhance marketing performance through the implementation of various strategies for customer acquisition, retention, and development.

Some major marketing issues are discussed such as:

- 1) What is a relationship? What are the key factors determining a high-quality relationship?
 - 2) Why do/don't companies want to engage in relationships with customers?
 - 3) Why do/don't customers want to engage in relationships with companies?
 - 4) How to develop and implement a CRM project?
 - 5) What is customer experience? How should we measure it? What are some experiential strategies for enhancing it?
 - 6) What is customer value? How can we measure it?
 - 7) How can we retain our profitable customers?
