Pedagogical contribution of the course to the program

LEARNING GOAL 1 : Students will know, understand, and use management tools appropriately.

Students will demonstrate knowledge of management tools in their scope of action.

Students will know how to implement their knowledge within an organization.

LEARNING GOAL 2 : Students will demonstrate awareness of ethical business practices, diversity and sustainable development.

Students will understand their business organization's responsibility regarding diversity, sustainable development and ethics.

LEARNING GOAL 3 : Students will be able to adapt effectively in an international environment.

Students will communicate their ideas effectively, both orally and in writing, in French and in two additional languages.

Students will demonstrate their ability to learn and take action when working in intercultural teams.

Description

This course aims to help students understanding basic concepts in Supply Chain Management. An overview of terminologies, fundamental concepts and situations encountered in the field of Supply Chain Management will be covered, such as transportation, warehousing, distribution, inventory, operation, sustainability, Supply Chain Networks, and continuous improvement.

This course stresses concepts, and strategies that can be applied to the operation, management and design of supply chain.

This course is designed for students who have never learned or learned very few on logistics or Supply Chain Management in business context.
